What is an Auditory Processing Disorder: Is it different from a speech–language or attention deficit disorder and how is it different?

What are tests of auditory processing?
What is the purpose of different assessment techniques including
The speech–language approach
The auditory test approach using degraded and dichotic speech
What is the contribution of non–linguistic tests of auditory processing?
What is the current status of electro–physiologic and imaging studies of APD?

What tests are available in English and other languages?
What are the current needs for development of test materials in Hong Kong?

What are basic approaches to management and remediation of persons with APD?

Case presentations and discussion
HKSA workshop on APD

Speaker: Robert W. Keith
Date: Sunday January 10, 2010
Venue: Multi-purpose Room (Room 301)
Li Ka Shing Medical Sciences Building
Prince of Wales Hospital

Auditory Processing Disorders: An Overview

8:30 – 10:00

Definitions: What is an Auditory Processing Disorder: Is it different from a speech-language or attention deficit disorder and how is it different?

10:00 – 10:20 - Break

10:20 – 12:00

What are tests of auditory processing?
What is the purpose of different assessment techniques including
The speech-language approach
The auditory test approach using degraded and dichotic speech
What is the contribution of non-linguistic tests of auditory processing?
What is the current status of electro-physiologic and imaging studies of APD?

12:00 – 13:00 - Lunch

13:00 – 14:00

What tests are available in English and other languages?
What are the current needs for development of test materials in Hong Kong?

14:00 – 15:00

What are basic approaches to management and remediation of persons with APD?

15:00 – 15:10 Break

15:10 to 16:00

Case presentations and discussion

**Program details subject to change without prior notice**

Remarks: HKSA has approved 6 CPD Points for this workshop.
Continuing Professional Development

CPD Lecture - Auditory Processing Disorder

Registration Form
(Deadline: 10th December 2009)

Name: *Prof./ Dr. / Mr. / Ms.

Institution / Organization:

Profession: *Audiologist / Speech Therapist / Others

Address:

Tel No.: Mobile No.:
Fax No.: E-mail:

*delete as appropriate

Registration category (Please “✓” where appropriate.):

Current HKSA member: ☐ free
Non HKSA member: ☐ $500

Payment Method

Please complete the form together with your cheque made payable to “Hong Kong Society of Audiology Limited”, and return to:
c/o Room 1308, Albion Plaza
2-6 Granville Road, Tsimshatsui
Kowloon, Hong Kong
Attn.: HKSA Secretary

For enquiries, please contact us at info@audiology.org.hk

DEADLINE: DECEMBER 10, 2009

**Registration accepted on first-come-first-serve basis. Full refund in case the seminar is cancelled due to force majeure such as swine flu outbreak. Otherwise, NO REFUND once registration is accepted.**
Robert W. Keith, Ph.D.

Professor Emeritus
Department of Otolaryngology and Maxillofacial Surgery,
College of Medicine, University of Cincinnati

and

Adjunct Professor of Audiology
Department of Communication Sciences and Disorders,
College of Allied Health Sciences, University of Cincinnati

Current Research Projects

Investigation of the relationships that exist among auditory processing, language and intelligence.

Development and Standardization of SCAN-3 Test of Auditory Processing Disorders – Revised, 2008

Several validation studies of the SCAN auditory test batteries

Biographical Sketch

Robert W. Keith is an adjunct professor of audiology in the Department of Communication Sciences and Disorders at the University of Cincinnati where he is also professor emeritus in the Department of Otolaryngology-Head and Neck surgery. Previously he was Director of Medical Education and Director of the Division of Audiology in the Department of Otolaryngology. He teaches doctoral level courses and advises both PhD and AuD students and student research in the Department of Communication Sciences and Disorders.

Dr. Keith is a fellow of the American Speech-Language Hearing Association. He is a founding member of the American Academy of Audiology (AAA) and subsequently served as president. He was chair of the AAA honors committee and chair of the American Board of Audiology. He was editor of the journal Ear and Hearing for seven years and serves on the editorial board of several professional journals.

Dr. Keith is the author of several tests for use in identifying auditory processing disorders including the SCAN auditory test batteries, and has many publications on the topic of APD including chapters and articles in the refereed literature. He is frequently invited to speak on auditory processing disorders both nationally and internationally. Currently he is a member of the general assembly of the International Society of Audiology and is chair of the Student Committee of the ISA. He serves as faculty advisor to the Cincinnati Chapter of the Student Academy of Audiology.
